“SKIN IN THE GAME”

Proxy Trading

Group

**Proxy
Trading
by being
a shareholder
into a
professional
Proprietary
Trading
Company.**

WHY ...

Nothing is more difficult, than to be able to decide. Most of the world will make investment decisions by either guessing or using their gut. They will be either lucky or wrong.

**If you delegate trading decisions to money brokers and consultants they gain when you lose.
“No “skin in the game”**

PROBLEM

Trading in the black swan era.

As an individual trader you can't win the trading war especially with cryptos extreme volatile ecosystem.

Now the black swans are the norm . Huge technological and geopolitical risks. Legal protectionism prohibits free access to global world class ETF.

No training , no qualitative benchmarks, no fair & ethical promotion of money and investments products,

Markets don't care for you as an individual investor unless you are very rich. The majority of investors are doomed because forex, derivatives, cryptos salesmen aren't friends but "enemies" protected by the law. Survivors are a rare exception and are a very small minority of experienced professionals.

BEYOND ...

Guessing
or using
your gut.
Being either
lucky or wrong.
Delegating trading
decisions
when there isn't
"skin in the game"

SOLUTION

Proprietary trading rather than blind trades losing money for consulting fees and commissions.

We as professional traders and co-partners under the same roof do the job having knowledge, experience, money management tactics, risk mitigation models.

No intuition but strictly technical trading assisted by cutting edge systems. No dogmas. Reality checks. Re-think. Openess.

We haven't any legal limitation for investments outside Europe.

Direct annual contact with 100.000 traders in Greece, Cyprus and Globally at the big Hellenism cities assisted by 50 one2one investment hybrid events.

"The leadership job of the twenty-first century is to enhance the brainpower of an organization by having leaders at all levels engaging in Virtuous Teaching Cycles. The case has been made that we now live in a knowledge era where the value of intellectual capital has supplanted physical assets. In this world leaders must make every one smarter while simultaneously aligning the energy and commitment of the people in their organizations."

So here's the argument in brief: 1. The most important breakthroughs come from loonshots, widely dismissed ideas whose champions are often written off as crazy. 2. Large groups of people are needed to translate those breakthroughs into technologies that win wars, products that save lives, or strategies that change industries. 3. Applying the science of phase transitions to the behavior of teams, companies, or any group with a mission provides practical rules for nurturing loonshots faster and better.

TAKE OFF STRATEGIES

Many black swans, lethal risks and your company is at a strategic inflection point

Organizational Advisors isn't the right solution. Exponential development Consulting (10X) is missing, testing ideas/business models, blitzscaling. Simply maintaining your position is a death sentence. In these situations "only the paranoid survives" Andy Grove. **Act non linear...**
